

MIKEL ECHEVERRIA

Pamplona, Spain

Description

Full Stack Developer with experience in both frontend and backend, enthusiastic about Artificial Intelligence and automation. Committed to delivering clean, maintainable code that solves real problems and enhances business processes.

Experience

October 2025 – Present

Software Developer — Biodatup

Building a comprehensive clinical trials platform using Django services and modern React interfaces. This involves designing relational data models and SQL workflows that provide reliable information for clinical and product teams. The platform aims to streamline data management and enhance collaboration among team members, ensuring that accurate and up-to-date information is readily available for decision-making and analysis.

Jan 2025 – Sep 2025

Full Stack Developer — Codetec Servicios Informáticos SL

- Design and development of management, accounting, invoicing, and logistics systems.
- Frontend with Vue.js, Nuxt, Ionic; backend with Node.js, Laravel (PHP), and SQL/NoSQL databases.

2024 Summer

Camp Counselor — Camp Longhorn Inks Lake, Burnet, Texas, USA

I had the opportunity to considerably improve my English level thanks to a total immersion in an English-speaking environment. In this context, I guided and supervised groups of children in various activities, promoting a safe and positive environment. Additionally, I obtained lifeguard certification, which allowed me to ensure safety during aquatic activities.

Jan 2024 - May 2024

Full Stack Developer — Tesicnor SL, Noain, Navarra | Prácticas

- Creation of APIs and REST services with Spring Boot.
- Use of JSF, Git, Maven, and MySQL for corporate projects.
- Full-stack development with Spring Boot (backend) and Angular (frontend).
- Optimization of queries and design of relational databases.
- Containerization and deployment with Docker.

Mar 2022 - Jun 2022

IT Intern — Burlada Town Hall

During my internship at the Burlada Town Hall as an IT specialist, I gained experience in problem-solving and teamwork. I contributed to the development of municipal IT systems, collaborating with professionals and strengthening my passion for computing and the technology field.
